- These prices now include shipping
- \$5.38 – Cost per roll of our high quality, heavyweight thermal roll paper for your Brother PocketJet printers.

We began our search for a quality thermal paper stock over five years ago. After extensive research, and actual "in the cruiser" testing of various thermal paper types, we selected a proven, heavyweight thermal paper product that consistently delivers flawless performance... then negotiated an agreement directly with the manufacturer that enables us to offer our highest quality thermal paper at very aggressive pricing. We sell only by the case in order to keep prices low.

*We believe that we have the best price/performance thermal paper program in the industry. We encourage you to compare our thermal paper roll product to what you're currently using in your **Brother PocketJet** and let us know what you think.*

Much thanks to our law officer friends in North Carolina for helping us test this product!
