

Modular Mobile Mounting System

Final assembly of all LEM Vehicle Printer Mounts require just two modular components:

Two(2) Modular Components:

Printer Mount Platforms (PMPs)

- Five (5) Common Printer Mount Platforms PMPs –
 - PMP-BPJ (Brother PocketJet)
 - PMP-ZRW420 (Zebra RW420)
 - PMP-CiP100P (Canon iP100)
 - PMP-HP100 (HP100)
 - PMP-HP470 (HP470)

Platform Mounting Kits (PMKs)

- Three (3) field Interchangeable Platform Mounting Kits PMKs –
 - HPMK (headrest platform mounting kit)
 - CPMK (console platform mounting kit)
 - PPMK (partition platform mounting kit)
- Concept
 - For each supported printer type, same *common* Printer Mount Platform coupled with one *interchangeable* Platform Mounting Kit creates desired vehicle printer mount unit (headrest printer mount, console printer mount, or partition printer mount (cage or Plexiglas))
 - Printer Mount Platform + Platform Mounting Kit = In-vehicle (headrest, console, or partition) Printer Mount
- Benefits
 - End User
 - Logical, “common sense” product design lowers deployment costs
 - Rapid, inexpensive conversion *in the field* between all combinations of vehicle printer mount options
 - Protects investment
 - Lower TCO (Total Cost of Ownership)
